WHY GARY

About Crane & Plant Hire

From crane availability to the final invoice, see equipment, crew, site requirements and job costs in one place.

Keep work connected

Bring sales, operations, stock and financial information together so each team has the context it needs.

See what is next

Track the status of work and the decisions that move it forward across the business.

Act on current data

Use live information rather than chasing separate spreadsheets and re-entering details.

Know the outcome

Follow costs, commitments and results through to completion, billing and reporting.

Plug n Play

The heavy lifting is already done.

Gary prepares a configuration around your operation and data, so your team starts with relevant workflows rather than a blank system. Onboarding, training and support help people get comfortable as you go live.

FROM DAY ONE

01 Discover

Map your needs, data and business processes.

02 Configure

Shape the workflow and prepare the team.

03 Go live

Train, launch and support ongoing work.

CRANE & PLANT HIRE

What you get

From crane availability to the final invoice, see equipment, crew, site requirements and job costs in one place.

Fleet & Equipment Management

Fleet Tracking

Real-time visibility of all mobile and tower cranes across job sites with live status updates and location tracking.

Maintenance Scheduling

Automated service reminders and comprehensive maintenance history tracking to keep your fleet in optimal condition.

Compliance Management

Track certifications, inspections, and regulatory requirements with automated alerts for upcoming renewals.

Utilization Reports

Monitor equipment usage patterns and optimize fleet deployment for maximum profitability.

Labour Hire & Crew Management

Crew Allocation

Assign operators and riggers to jobs based on skills, certifications, and availability.

Certification Tracking

Monitor operator licenses, tickets, and training requirements with expiry alerts and renewal tracking.

Mobile Crew Access

Field staff access job details, forms, and timesheets on mobile devices for real-time updates.

Skill Matrix

Track crew competencies and qualifications for optimal job matching and compliance.

CRANE & PLANT HIRE

Operations in detail

From crane availability to the final invoice, see equipment, crew, site requirements and job costs in one place.

Crane Scheduling & Dispatch

Visual Scheduler

Drag-and-drop calendar for equipment and crew scheduling with conflict detection and optimization.

Job Site Management

Track multiple sites with location-based dispatch, site requirements, and access details.

Real-time Updates

Live status updates from field to office with instant notifications and schedule changes.

Transport Coordination

Manage crane transport, mobilization logistics, and route planning for efficient deployment.

Timesheet Software & Payroll

Digital Timesheets

Mobile time capture with GPS verification for accurate labour tracking and billing.

Automated Charges

Calculate overtime, penalty rates, and allowances automatically based on your award rules.

Minimum Hire Rules

Apply complex minimum hire periods and call-out charge rules automatically to invoices.

Approval Workflows

Digital sign-off by site supervisors and managers with audit trails and notifications.

CRANE & PLANT HIRE

Connected capabilities

From crane availability to the final invoice, see equipment, crew, site requirements and job costs in one place.

Contracts, Pricing & Job Costing

Contract Management

Manage hire agreements, terms, and special conditions with document storage and tracking.

Dynamic Pricing

Flexible rate structures for wet hire, dry hire, and labour with customer-specific pricing.

Job Costing

Track profitability by job, client, or equipment with real-time cost analysis.

Billing Automation

Generate invoices based on timesheets and hire periods with accounting integration.

Mobile Field Operations & Safety

Mobility Access

Full-featured mobile access for field operations including job details, forms, and reporting.

Digital Forms

Site safety checklists, lift plans, and inspection forms with photo capture and signatures.

Location tracking

Verify crew physical location while entering time sheet data.

Safety Management

Incident reporting, safety documentation, and compliance tracking for workplace safety.

THE NEXT STEP

Why choose Gary

A connected approach to crane & plant hire built around the way your team actually works.

- **One business picture**
  From crane availability to the final invoice, see equipment, crew, site requirements and job costs in one place.
- **Practical detail**
  Use the tools that matter to your operation: fleet & equipment management, labour hire & crew management, crane scheduling & dispatch.
- **Visibility where it counts**
  Follow information across teams, monitor progress and keep decisions grounded in current records.
- **A supported start**
  Discuss your needs, prepare the configuration and help your people adopt the new way of working.

HOW WE WORK TOGETHER

01 Discover

Understand your goals and current processes.

02 Prepare

Configure the workflows and bring in your data.

03 Go live

Train the team and support the transition.
